

# REGISTRATION PAGE

## GOAL:

To create a website which gathers the information of the students and use this information for campus placement. It also provides information to the students about the process of campus drives and also eligibility criteria.

## REQUIREMENTS:

1. windows 9,10,10.1 versions
2. visual studio code
3. google chrome (recommended), safari
4. RAM 4(recommended) to 8gb.

## Overview of the website:

This website consists of registration ,login form which will be used to gather the information like student name ,EmailId,date of birth,passout year,CGPA,student contact details,PIN number.

## Website details:

The website consists of a Title,navigation bar which includes home,about us,registration,contact us,login.

These include hyperlinks which are used to navigate to their respective pages.

Client side validation is used to validate different fields like username,password,email address.
